A surgical mesh with exceptional handling and strength.

Conforming
+
Supportive
+
Reinforcing
A surgical mesh with the features you want most:

- Suturable with exceptional strength
- Thin, natural matrix allows contour control
- Supports host cell integration and revascularization

Processed to preserve natural proteins and growth factors:

- **Structural Proteins** (Collagen, Elastin) Provides strength, structural support, and recoverable elasticity.
- **Glycoproteins** (Fibronectin, Laminin) Promotes cell attachment.
- **Proteoglycans** (Versican) Sequesters growth factors.
- **Glycosaminoglycans** (Chondroitin, Sulfate) Mediates cell communication.
- **Growth factors** (VEGF, FGF, TGF-β) Stimulates angiogenesis, cellular proliferation, and controls inflammation.

*Bench Test results are not necessarily indicative of clinical performance. Testing performed by DSM Biomedical. Data on file at DSM Biomedical.

**The effect of these components on the performance of Meso BioMatrix Mesh has not been clinically evaluated.
Ideally suited for plastic and reconstructive applications.

Meso BioMatrix is an acellular surgical matrix ideal for plastic and reconstructive procedures. Derived from porcine peritoneum, Meso BioMatrix Mesh is naturally strong, thin, and conformable.

The strength and elasticity required to support your soft tissue repairs.

In pre-clinical data Meso BioMatrix appeared to facilitate the regeneration of tissue without eliciting a negative biologic response.*

*Pre-Clinical study evaluated the effects Meso BioMatrix had on tissue regeneration when implanted subcutaneously in a sheep model compared to an empty control. Bench test results are not necessarily indicative of clinical performance. Testing performed by DSM Biomedical. Data on file at DSM Biomedical.
MTF Biologics offers innovative and effective solutions in plastic and reconstructive surgery. We advance the science of tissue transplantation through our commitment to research and development. Refer to the Instructions for Use for the cleared indications for use.
