

Not All
Heroes
Wear
Capes...

but our MTF Biologics
Healing Hero recipients do.

DYLAN BONE GRAFT RECIPIENT

About MTF Biologics

MTF Biologics is a global nonprofit organization that saves and heals lives by honoring donated gifts, serving patients and advancing science. We provide safe, high-quality tissue grafts from donated human tissues that are used in a growing array of clinical fields, including orthopedics, plastic and reconstructive surgery, wound care, and regenerative medicine.

Our extensive screening processes, including medical and lifestyle histories, allow us to provide safe, high-quality tissue grafts for patient recovery, education and research.

Since our inception in 1987, MTF Biologics has provided over 9 million allografts worldwide from over 137,000 donors. We save and heal lives.

MTF Biologics is
excited to announce
the **Healing Heroes
Bear Program** for
pediatric patients
receiving MTF
allografts.

Not all super heroes wear a cape.

And not all heroes are big and strong. But, like your young patients braving tests and treatments for serious and life-threatening conditions, they all find the strength to persevere, endure, and overcome overwhelming obstacles.

***In honor of them, we present
our Healing Heroes Bear.***

The MTF Biologics Healing Heroes Bear is a Vermont Teddy Bear that is machine washable, hypoallergenic and child safe. It looks every part the superhero, with a cape and mask. But the real heroics come in the comfort, companionship and inspiration the bears bring to your little heroes during their hospital stay.

We offer these bears to pediatric patients receiving life saving and life healing allografts from MTF Biologics; from young burn patients who have received split thickness skin grafts and children obtaining large osteoarticular allografts for the treatment of osteosarcoma, to youth treated with costal cartilage and adipose allografts to correct craniofacial deformities.

The bears are also provided in honor of the many heroic donor families who courageously give the gift of life by consenting to tissue donation, so these and many other life enhancing allografts can be made available to those in need.

We hope the MTF Biologics Healing Heroes Bear will be a welcomed companion and source of comfort to your patients during their treatment and recovery.

Each bear is shipped with a nylon carrying bag so he can accompany your patient heroes wherever they go. Also in the bag is a child-size cape and mask, and an activity book to help them pass the time during their hospital stay.

Linking Lives

Here's to the Heroes both big and small.

MTF Biologics is happy to facilitate anonymous, confidential communication between your heroes and ours, through our "Linking Lives" program.

Many allograft recipients write thank you notes to their donor families to express gratitude for their selfless gift and share how their loved one's donated tissues have helped their recovery.

Visit mtfbiologics.org/linkinglives to view sample writings and allow your patients to upload their own letters.

To request a Healing Heroes Bear for one of
your heroes, or for more information about
the program and MTF Biologics allografts,
